

## AC++ - Advanced C++

## AC++ - Advanced C++

General information	
<b>Module Code</b>	AC++
<b>Unique Identifier</b>	AdvCPP-01-MA-M
<b>Module Leader(s)</b>	Prof. Dr. Manzke, Robert (robert.manzke@haw-kiel.de) Greve, Thomas (thomas.greve@haw-kiel.de)
<b>Lecturer(s)</b>	Greve, Thomas (thomas.greve@haw-kiel.de)
<b>Offered in Semester</b>	Sommersemester 2026
<b>Module duration</b>	1 Semester
<b>Occurrence frequency</b>	Regular
<b>Module occurrence</b>	In der Regel im Sommersemester
<b>Language</b>	Englisch
<b>Recommended for international students</b>	Yes
<b>Can be attended with different study programme</b>	Yes

Curricular relevance (according to examination regulations)
Study Subject: M.Sc. - MCS - Computer Science (PO 2023, V1) Module type: Wahlmodul Semester: 1, 2
Study Subject: M.Sc. - MIE - Information Engineering (PO 2022, V3) Module type: Wahlmodul Semester: 1, 2, 3

Qualification outcome
<i>Areas of Competence: Knowledge and Understanding; Use, application and generation of knowledge; Communication and cooperation; Scientific self-understanding / professionalism.</i>
<p>Students will acquire/deepen the following competences:</p> <p>Technical: Students who successfully complete this course will have a general understanding of programming according to the standards C++11 and beyond. They will deepen their C++ skills by learning how</p> <ul style="list-style-type: none"> <li>- to avoid programming and coding errors</li> <li>- to make programming more economical by generating and using reusable code</li> <li>- to optimize their programs</li> </ul> <p>Social: Knowledge will be exercised by lab projects, which are carried out in teams. Results will be presented by the group.</p> <p>Personal: Students will be able to assess their own programming skills at the beginning of the course relative to its end. Due to the exposure to the vastness of C++(11) they will have a more realistic perspective on their own programming skills and what is missing to become an expert (specialization).</p>

<b>Content information</b>	
<b>Content</b>	<ul style="list-style-type: none"> <li>- Components being added to the language and the Standard-Library by the standards pursuing C++11.</li> <li>- Differences in programming: pre- vs. post-C++11</li> <li>- Errorless code: Categories of typical (often made) mistakes, Tools to detect those (linter, sanitizers, setup of static tests)</li> <li>- Reusable code: Benefits and pitfalls of code-reuse, Differences between reusable and application-specific code, Static and dynamic libraries, Sources of existing libraries, Setting up of own libraries</li> <li>- Optimizing code: Optimization for space vs speed, Necessity of measurement; 80/20-rule, data structures, algorithms and code patterns which may benefit most, Tools for measurement (timers and profilers)</li> </ul>
<b>Literature</b>	<p>A Tour of C++, 3rd ed.; Bjarne Stroustrup; Addison Wesley; 978-0-13-681648-5</p> <p>Effective C++-Series; Scott Meyers</p> <ul style="list-style-type: none"> <li>- Effective C++, 3rd ed.; 978-0-321-33487-9</li> <li>- More Effective C++; 978-0-201-63371-9</li> <li>- Effective Modern C++; 978-149-190399-5</li> <li>- Effective STL; 978-0-201-74962-5</li> </ul> <p>Optimized C++; Kurt Guntheroth; O'Reilly; 978-1-491-92206-4</p> <p>API-Design for C++; Martin Reddy; Morgan Kaufmann; 978-0-12-385003-4</p> <p>Secure Coding in C and C++; Robert C. Seacord; Addison-Wesley; 978-0-321-82213-0</p>

<b>Teaching formats of the courses</b>	
<b>Teaching format</b>	<b>SWS</b>
Labor	2
Lehrvortrag	2

<b>Workload</b>	
<b>Number of SWS</b>	4 SWS
<b>Credits</b>	5,00 Credits
<b>Contact hours</b>	48 Hours
<b>Self study</b>	102 Hours

<b>Module Examination</b>	
<b>Examination prerequisites according to exam regulations</b>	None
<b>AC++ - Klausur</b>	Method of Examination: Klausur Duration: 120 Minutes Weighting: 100% wird angerechnet gem. § 11 Absatz 2 PVO: No Graded: Yes

<b>Miscellaneous</b>	
<b>Recommended Prerequisites</b>	Pre-requisites: Knowledge and practical experience of C++ and programming styles (procedural, object-oriented and generic).The level of module PIC) will be assumed.
